How to unlock A115M and A115F V2 security by SamKEY CodeReader

At first , Check the software version in the phone by dialing *#1234#

SamKEY Code Reader

Caution:

A115M :

Newer firmware version must be downgraded to A115MUBU2BUE1

A115F :

Newer firmware version must be downgraded to A115FXXU2AUA3 or A115FXXU2BUE5

1. Make sure usb debugging is activated

> Enable USB debugging in phone :

- Goto Settings > About device > Software info > Tap on Build number for 7 times
- Now Developer options menu is activated.
- Go to Settings > Developer options in phone.
- Enable USB debugging option.

2. Connect phone by USB cable to PC directly

> Allow USB debugging

- Tick "Always allow from this computer"
- Then press OK
